

Nothing will work unless you do.

Describe a person you know or have known who takes action, goes to work and doesn't sit back and rely on other people to get results for them.

Is there something in your life you want to get done that you should take action on and quit waiting on others to get it started?

Is there someone in your life (personal or professional) that would benefit from this idea *Nothing will work unless you do* (quit waiting on others and get to work on it)?
