

Innovate and Adapt

Describe a coach, teacher or boss that you have had or have that innovated (came up with a new approach) that produced better results because it was a better way to do things based on the people involved.

Without naming names describe a coach, teacher or boss that you have had or have that refused to change his/her approach even though it wasn't a good fit for the people involved.

Do you have any situations where you could try a new approach?
